Adelphi, Ohio
Established 1880

Newsletter

Date: April 8, 2024

Greetings and Salutations!

The purpose of today's missive is two-fold. The first is what you expected when you saw this email arrive – Kolin's list of news and reminders for the Adelphi Band schedule. The second is a missive from Jeff Mathew, which addresses the issue of surplus "old" Adelphi Band uniforms – lots of them!

As a reminder, information on our schedule can also be found on the band web site:

<http://adelphiband.weebly.com/>

While visiting the web site you will note numerous audio recordings, video recordings, music downloads, and pictures of the band. As new material is being dug out of basements, it is being added to the web site.

Check back regularly to see what new material has been recently added.

Stay warm!

John Mathew

Re: What to Do With Surplus Adelphi Band Winter Uniforms?

INTRO:

As the family of Glenn Hinton (last Band Manager) was recently cleaning out his barn in order to completely turn the property over to the new owners, they turned over to me many extras of the latest band uniform coats, pants and hats. While on occasion we have had some young musicians of elementary and Jr High size in the band, these items look like to be pretty much all “adult” sizes. Needless to say, I don’t personally need the uniform items, and I will definitely not be keeping these items at my house.

ISSUE TO BE ADDRESSED:

Where can these uniform items go to live out a useful life?

PROJECT CONDITIONS:

- Unless someone wants to take this project over, my plan is that all these items are leaving my garage, and my spare bedroom, at the same time. I have no idea why anyone would want individual uniform items, anyway, but I have no interest in stringing this out by making multiple appointments with countless people in order to try to dispose of the items piecemeal.
- While I have a couple ideas on who might find the uniform items useful, I am open for your thoughts.
- I’m personally not interested in trying to charge money for the uniform items and dealing with all that hassle. I think that trying to do that would be cumbersome and interfere with the first project objective of getting rid of them.

Contact me if you have questions or ideas.
