Introducing . . .
The Vinton County National Bank
History Museum

Our new museum features photographs and memorabilia from our 150 year history! Look for these special items as you tour:

A portrait of Daniel Will framed with 1867 money.

A water wheel used daily by office workers for many years.
Do people today even remember these once useful tools?

A four leaf clover that we kept after a campaign that invited customers to improve their luck and bring us four leaf clovers! This was one of many silly, creative promotions we have used over the years!

An image of CBI President/CEO Tom Will
holding a \$10 bill signed by two of his ancestors

A newspaper clipping and picture of Ricky Booth from 1967 when he won our slogan writing contest. Do you remember "A Center of Service for A Century"?

A book containing writings by longtime bank leader Bob Will.

Commemorative piggy banks given to customers over the years. The pastel colored pigs were only recently found among J.G. Will's possessions in the bank - some still are full of coin!

Images of the Bank's first female employee - Belle Jenkins - who spent her entire 55 year career with the bank!

Carnations. When this building was constructed in 1925, well wishers filled the bank lobby with red carnations for the open house. Local newspapers noted the flowers when they raved about the beautiful new building and massive crowd of people who came to see it.
